1. Maximum wireless signal rate derived from IEEE standard 802.11ax/ac/n/g/b specifications. Actual data throughput will vary. Network conditions and environmental factors, including volume of network traffic, building materials and construction, and network overhead, lower actual data throughput rate. Environmental factors may adversely affect wireless signal range.

2. We recommend using D-Link DPP series power bank (DPP-201) and DCP series GaN charger (DCP-101 & DCP-651) to supply power to the device.
