Hardware Overview

Power LED
A solid light indicates that the device is receiving power.

Ethernet LED
A solid light indicates a connection on the Ethernet port. The LED blinks during data transmission.

Powerline LED
A solid light indicates that the device has detected another Powerline device on the network.

Ethernet
Connect CAT5 Ethernet cable to the DHP-300 Ethernet port.
Hardware Installation

Power

Plug the DHP-300 into an AC wall outlet or power strip.

Note: Power source is confirmed when the green LED Power Indicator on the DHP-300 is illuminated.

Connect the Ethernet Cable

Connect the included Ethernet cable to the network cable connector located on the DHP-300 and attach the other end of the Ethernet cable to the network or PC.

Note: Network Connectivity is confirmed when the green Powerline LED indicator on the DHP-300 is illuminated.
Software Installation

Follow the simple steps below to run the Setup Wizard to guide you quickly through the installation process.
Insert the **D-Link DHP-300 Powerline HD Ethernet Adapter** CD into your CD-ROM drive. If the CD Autorun function does not automatically start on your computer, click Windows® Start > Run.

In the Run command box type "**D:\DHP300.exe**", where D: represents the drive letter of your CD-ROM. If it does start, proceed to the next screen.
Click on **Install Utility**

The InstallShield Wizard will begin the DHP-300 software

Click **Next**

Setup will install to the default location: *C:\Program Files\D-Link DHP-300\DHP-300 PLC Utility*, where C: represents the drive letter of your hard drive. To install to a different location click **Browse** and specify the location.
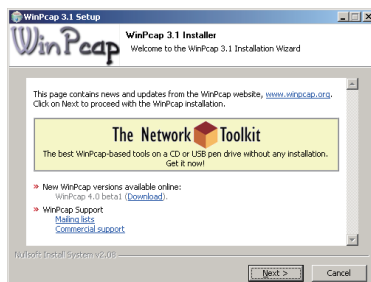

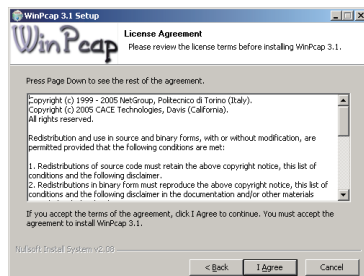

Click **Next**

Click **Next**

The WinPcap 3.1 installation is necessary to run the D-Link DHP-300 Utility, click **Next** to continue with the installation.

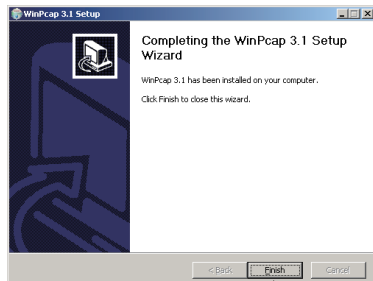

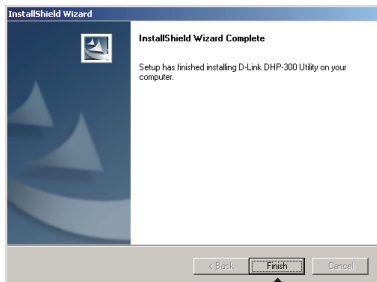

Click **Next**

Click **I Agree**

The WinPcap 3.1 Installation is complete. Click **Finish** to close the wizard.

Click **Finish**

The installation wizard is now complete click **Finish**.

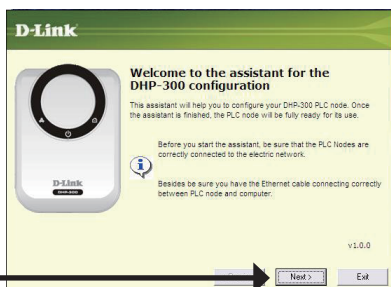

Click **Finish**

Configuration

After you have completed the D-Link DHP-300 Utility installation wizard, double-click the D-Link DHP-300 PLC Utility icon on your desktop to start the configuration of the DHP-300.

Double-click the **D-Link DHP-300 PLC Utility**

The utility provides you with the option of setting your own unique Network ID and the ability to prioritize traffic passing through the network.

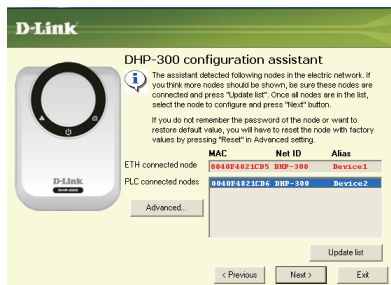

Click **Next**

Configure the PLC connected nodes first (the remote DHP-300 which is not connected to the PC), and configure the ETH connected node last (the local DHP-300 connected to the PC).

Note: If you configure the ETH node first and change the Net ID or Encryption Key, you will not have access the the PLC nodes.

To configure a DHP-300, select it and click **Next** to continue.

Click **Next**

This screen shows the current configuration of the DHP-300. You can modify any of the parameters and click **Next** to save your configuration.

- **Net ID**:
  Powerline network name.

- **Encryption Key**:
  Powerline network password

- **Password**:
  Configuration Assistant password

- **Alias:**
  Device name

Click **Next**

If you are finished configuring this node you need to configure the rest of the remote nodes before you configure the local node. Click the **Next** button to continue. Once all nodes are configured, click **Finish** to close the utility.

Click **Next**
