

Overview about the Nuclias Connect App and how to integrate an Access Point into the DNH-100 profile via the App

1. Overview about the Nuclias Connect App

To **integrate an Access Point** you can directly visit [page 6](#).

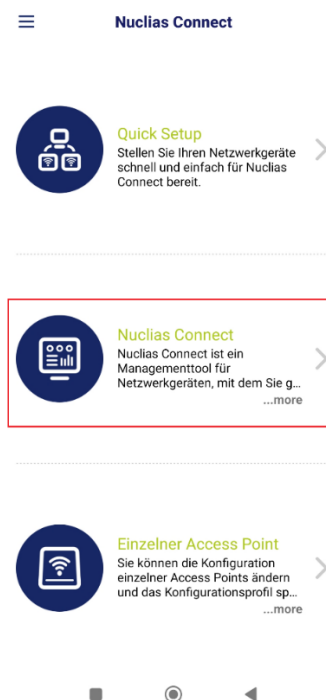

Please note, the Nuclias Connect app does not replace the DNH-100.

The Nuclias Connect App gives you an **overview** about access points and switches you have added to your DNH-100 profiles.

It is not possible to set up the DNH-100 profiles with this app.

Please start the Nuclias Connect app on your Android or Apple Smartphone or Tablet.

In the center, tap on **Nuclias Connect**.

If you haven't added a DNH-100 into the app yet, please tap on the + icon.

Willkommen zu Nuclias Connect

Wählen Sie einen Nuclias Connect-Server für die Verbindung aus. Wenn Sie keinen haben oder Ihr Server nicht aufgeführt ist, können Sie einen neuen registrieren.

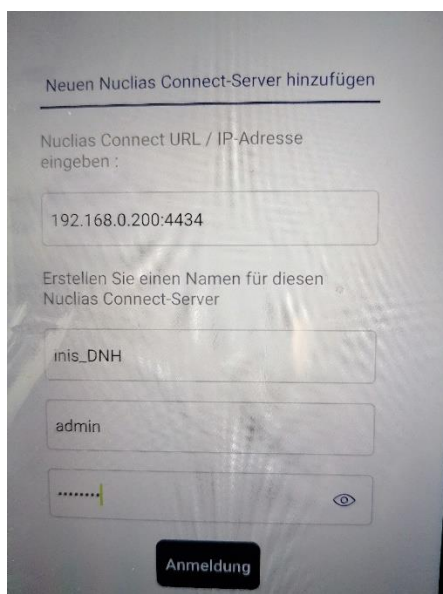

- Add the DNH-100 IP-address to your network, e.g. 192.168.0.200

If the DNH-100 does not provide the default port 443, then enter the appropriate port, e.g. 192.168.0.200:4434

The public IP-address or DynDNS address can also be specified if access is to be made via the Internet.

Please make sure that the TCP port of the DNH-100 is allowed/routed in the router/firewall.

- Give the connection a **name**.
- The username is **admin**.
- Enter the DNH-100 **password**.
- Then tap on **Apply**.

Now tap on the entry you created to connect the app to your DNH-100.

If necessary, login with the admin password.

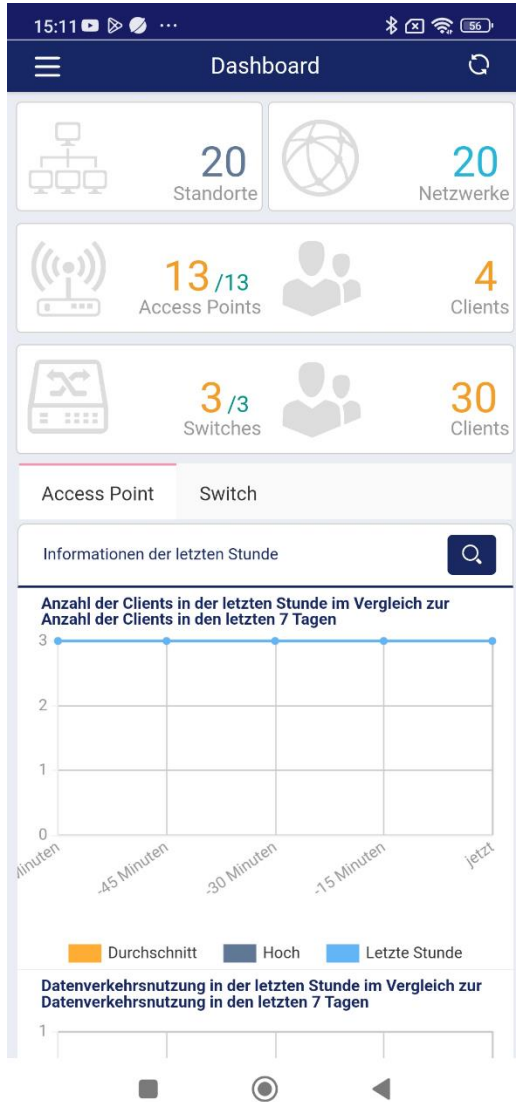

Willkommen zu Nuclias Connect

An overview like in your DNH-100 dashboard will appear if you connect with a web browser to the DNH-100 configuration interface.

Tap the **three bars** at the top left to navigate through the available menus.

2. Access Point integration into your DNH-100 profile via the Nuclias Connect App

Start the **Nuclias Connect app** on your smartphone or tablet.

Then tap on the **three bars** at the top left.

Nuclias Connect

Quick Setup

Stellen Sie Ihren Netzwerkgeräte

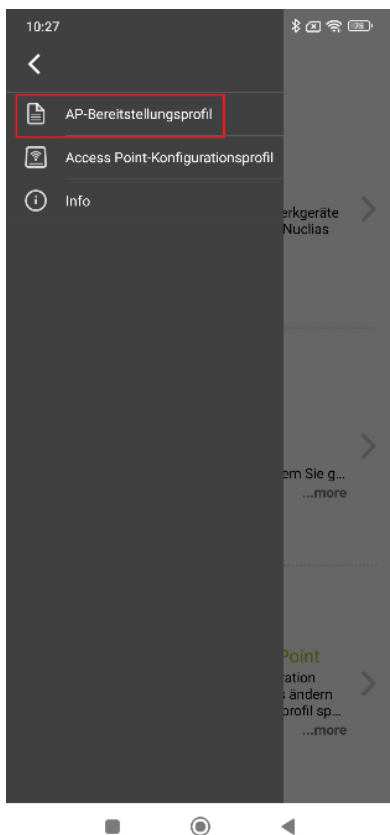

Tap on **AP Provisioning Profile**.

Now tap on the + icon.

Please note:

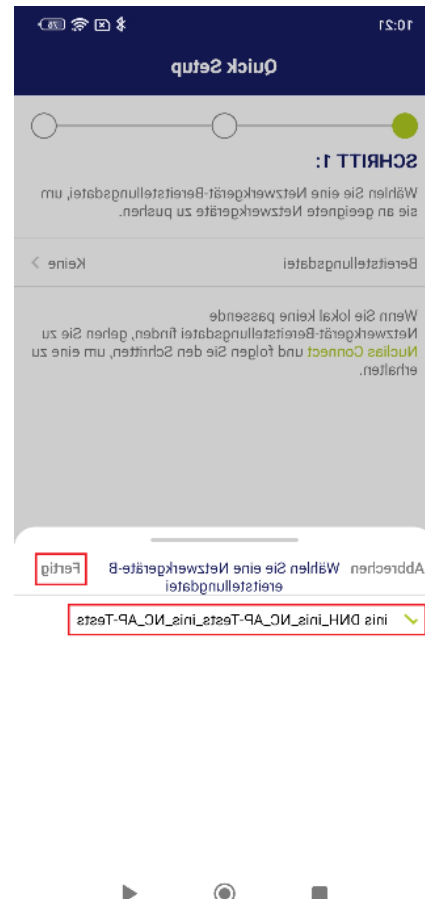

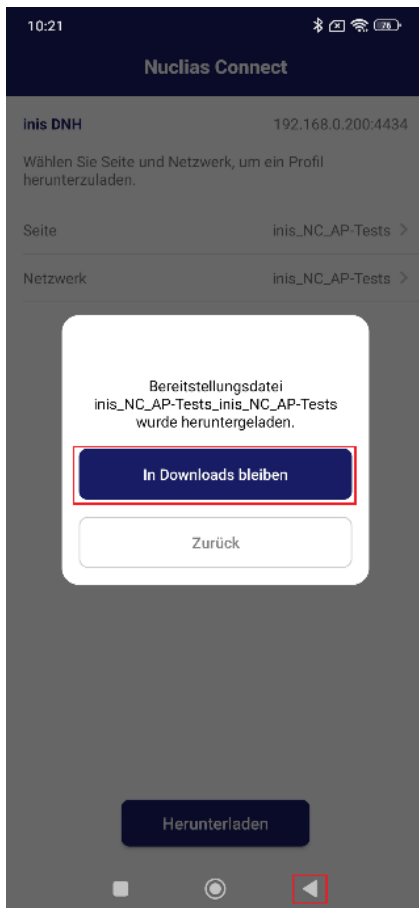

If you have not yet connected the Nuclias Connect app to your DNH-100, then please follow the instructions on [page 2 and 3](#).

Select **site** and **network** (profile) of the DNH-100 in which the access point should be integrated and tap **Download**.

Tap on **Stay in Downloads**, then tap the **Back button**.

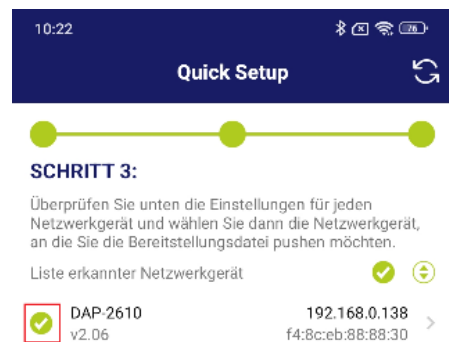

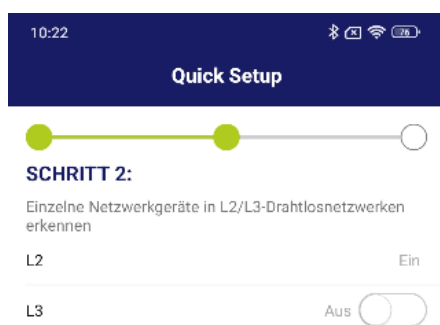

Now tap on **Deployment File**, select the previously downloaded file, tap on **Done** and finally on **Next**.

Now search for the access point to be included in the DNH-100 profile.

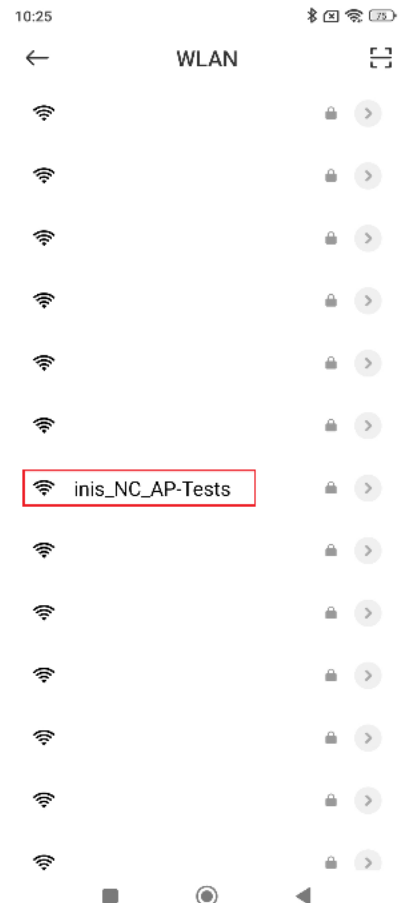

Normally the **L2** search (Layer 2) is sufficient.
Tap on **Next**.

The access point is found.
Place a tick in front of the access point you want to include and tap on **Push Provisioning File**.

When **Push is successfully** is displayed, tap **Finish**

After a few minutes, the access point is active in the DNH-100 profile and the WLAN signal is sent out.
