

This product can be set up using any current web browser, i.e., Internet Explorer 6 or Netscape Navigator 6.2.3.

#### DWL-G710 D-Link AirPlus<sup>™</sup> G Wireless Range Extender

## Before You Begin

It's best to use a computer (with an Ethernet adapter) that is connected to a switch for configuring the DWL-G710. The default IP address for the DWL-G710 is **192.168.0.30** with a Subnet Mask of **255.255.255.0**. You will need to assign your computer a Static IP address within the same range as the DWL-G710's IP address for the purpose of configuring the DWL-G710. See the Manual on the CD-ROM if you need assistance in assigning a Static IP address for your network adapter.

## Check Your Package Contents

If any of the above items are missing, please contact your reseller.

### Connecting The DWL-G710 Wireless Range Extender To Your Network

- A. Connect the power adapter to the **receptor** on the rear panel of the DWL-G710 and then plug the other end of the power adapter to a wall outlet or power strip. The Power LED will turn **ON** to indicate proper operation.
- B. Using a Ethernet cable, insert one end of the cable to the LAN port on the rear panel of the DWL-G710 and the other end of the cable to a switch. Note: You also have the option of connecting the DWL-G710 directly to the computer that will be used for configuration. The Link LED light will illuminate to indicate a proper Ethernet connection.
- C. Computers with 802.11g wireless adapters such as the DWL-G630 AirPlus<sup>™</sup> G Wireless Cardbus Adapter and the DWL-G510 AirPlus<sup>™</sup> G Wireless PCI Adapter can connect to the DWL-G710.

#### Encryption

The DWL-G710 is capable of two levels of wireless encryption 64-bit and 128-bit. **By default encryption is disabled.** You can change the encryption settings to enable more secure wireless communication. Keys may be entered in HEX (0-9, A-F) or ASCII format. Select the key type and size you wish to use and enter the key in the field provided.
