
No.	DK1100167
Subject	The total numebr of DWL-8600Ap can be managed under 8 peer DWS-4026
Type	General information
Category	Ethernet Switch
Model	DWL-8600AP , DWS-4026
Problem Description	The DWS-4026 can manage total 64 DWL-8600APs and DWS-4026 can group 8 peer switch together, but one peer group can only manage maximum number 256 of DWL-8600APs, because one peer group only has one cluster Swtich which would display all the managed AP, so 256 Aps is the limitation.
Solution	If you want to manage 512 Ap by using 8 DWS-4026, then you have to separate them into 2 peer group and each peer group consisted by 4 DWS-4026.
